

## Microscopy & Image analysis technician

The **Core Facility Imaging** of the Medical University of Vienna is looking for a new team member (f/m/d) as of 01.08.2024, in particular to support our new Multiplexed Protein Imaging Platform.

The employment contains **30 hours per week** and is limited to 2 years, with the option of an indefinite extension. The monthly gross salary is **€2.684,10 (14 times a year)**.

Your tasks:

- Planning and support of multiplexed imaging experiments
- Support in data analysis of multiparameter image data
- Assist with general core facility tasks, including: ordering, inventory, routine checks of systems
- Provide training and support in the operation of the microscopes
- Perform routine maintenance and quality monitoring
- Participate in the organization of events, such as: System demonstrations, user training and outreach events
- Support in the areas of basic image/data analysis

Your profile:

- BSc. or MSc. in life science, medical science, biophysics or similar.
- Relevant work experience, ideally in a core facility and/or academic environment
- Service-oriented working style
- Ability to work independently and as part of a team

- Structured, precise and reliable way of working and a high level of organizational skills
- Excellent communication skills in German & English

If you would like to apply, please send a **CV and a letter of motivation with two reference contacts** to:

Philipp Velicky
